ELARA CIRCLES · LIFE AREAS AND LIFE STAGES · V3 · DESIGN PROTOTYPE, NOT IN THE APP

Read first. Find your stage. Join to ask or reply.

One complete screen per page. This revision changes four things and keeps the visual direction of v2:

- **Life stages are easy to find.** “Life areas” and “Life stages” are two tabs at the top of Explore Circles, always visible.
- **A newcomer can read first.** Circles home leads with a useful question and one real reply. “Your Circles” is a single quiet line. Ask stays compact; no date, no large composer.
- **Shown at scale.** A busy Circle with 38 new questions, a “Waiting for a first reply” card, followed tags marked “For you”, and a first-reply state.
- **Who may read and who must join, said once.** Any woman in Elara can read a Circle. Only members of that Circle can ask or reply.

Proposals, not facts. Question routing, “For you” ordering, followed tags, the waiting list, host review and any response target are design proposals. None exists in the app today, and no screen promises a reply time. All names, questions and replies are fictional.

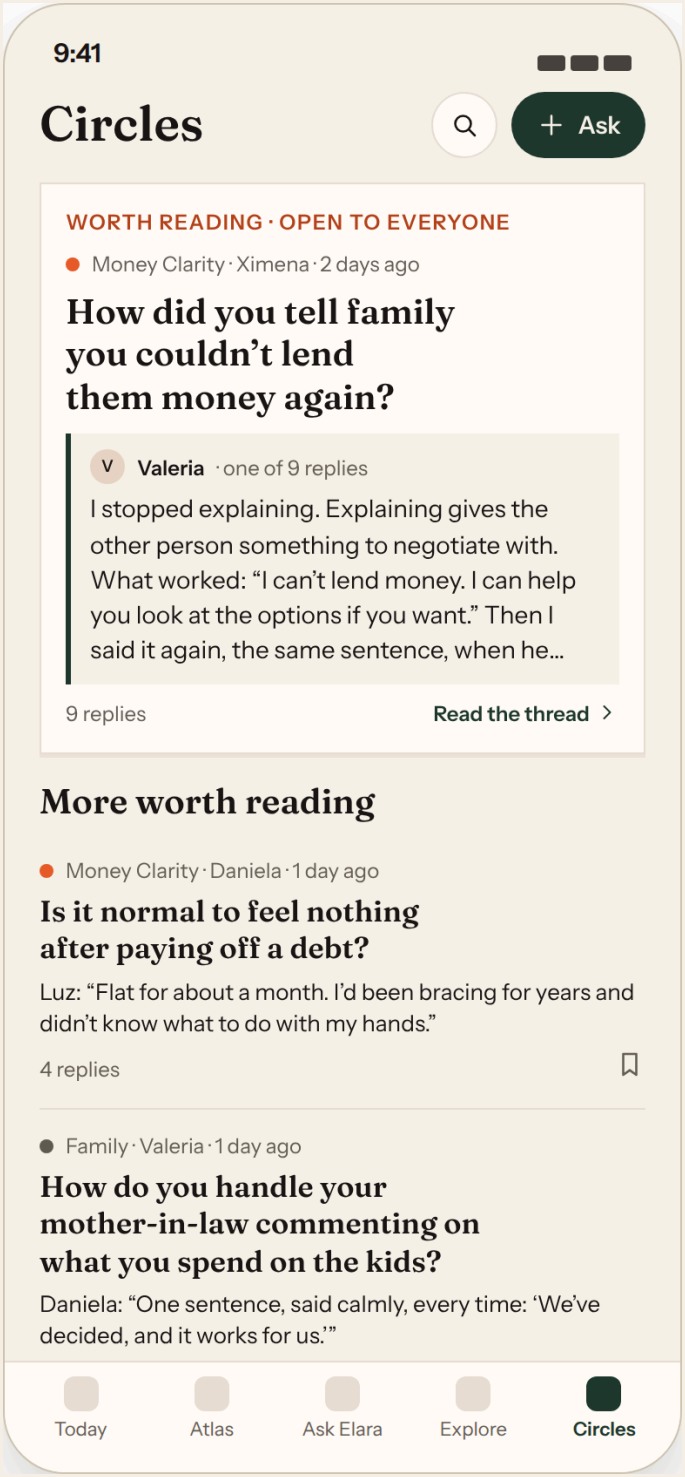

Sections: 390 × 844 · 320 × 568 · 320 × 568 at larger text (130 %) · full-length scrolls. Interactive version: previews/circles-topic-communities-v3/index.html (A–E chips, device and text-size toggles).

`esf.pdf` and `circle1.pdf` were not accessible in this session, so this is the broad Circles revision only; private-room screens are unchanged. Reference used: the v2 PDF in this repository.
