Week transitions, Today on small screens, Up next, Practice headers

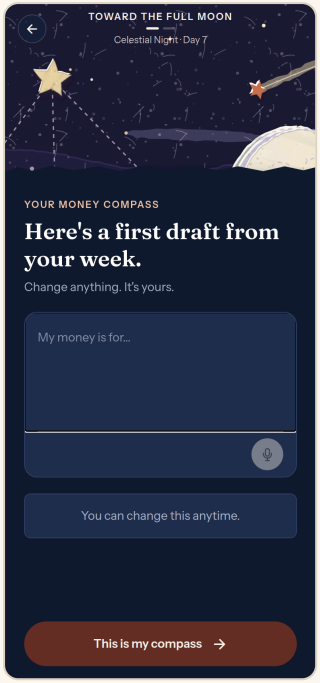

Walked in the running app (web build, local API, test account), before and after this pass. 390 × 844 unless noted. The next morning was reached by moving stored answer times back 26 hours under the repo's unlock rule (next day at local midnight); no controls were added to the app.

- Pages 2–9: the four transitions, two pages each.
- Page 10: Week 3 Today card at 320 × 568 and 390 × 844.
- Page 11: the Up next preview.
- Page 12: Practice headers.

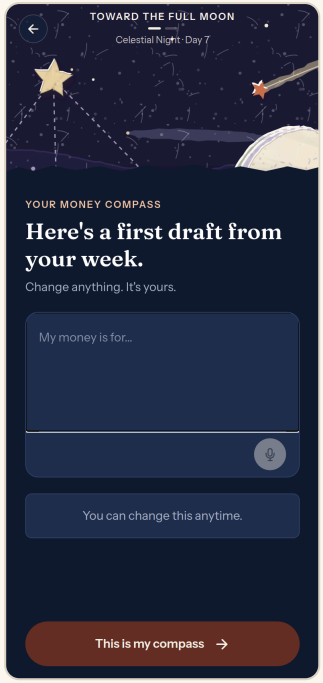

Fixed: a day opened before it unlocked showed the next week's note with a Begin button; the last world's close offered "Meet the next world" onto nothing; empty-sky practice headers; Start today's practice under the tab bar at 320 × 568; no picture of what comes next.

320 × 568 · 130% zoom

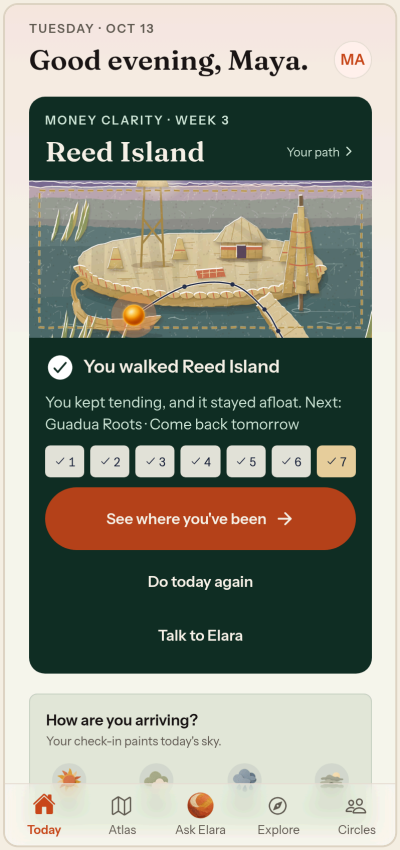

390 × 844 · after

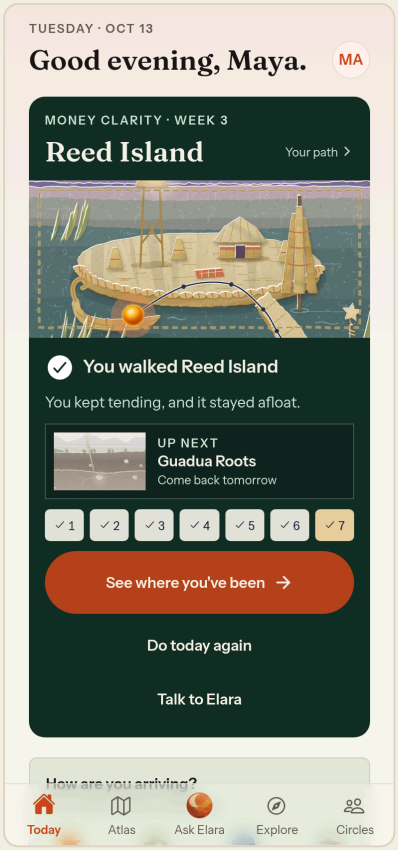

390 × 844 · 130% zoom

Zoom is a stand-in for larger system text (the web build ignores it); at zoom the card scrolls and the button clears the tab bar when scrolled.

The question sheet covers all but the strip under the header; these three worlds are now framed lower so the strip holds their horizon.
