TOWARD 10 / MONEY / ENGLISH

What’s missing for a 10 isn’t on paper

V3.2 is ready to test. What would take it to a 10 is up to the women: whether a rule helps them outside the app, and whether they come back on day 8. Here are three pieces to get there.

Piece	What for	Pages
The sign-ups	What the beta forms say and what it changes for the test.	2
Test kit	Test the week with 5-6 women, in the app or over WhatsApp, starting this week.	3-6
Week card	Something concrete she takes outside the app.	7
Week 2	So day 7 leads somewhere instead of just ending.	8-10

What only people can do

- Test and fix. One round with real women is worth more than another version of the document.
- Make the Spanish María’s and Ale’s, and have Ale record the audio.
- Have someone answer the questions the women write. Proposal: Ale, anonymously and with permission, in a weekly audio.
- Amounts, currency and the financial regulator for each country.

Separate file

“Mensajes_WhatsApp_Semana1_ES.txt”: all seven V3.2 days ready to copy and paste into WhatsApp, with the reply that matches each option.

WHAT THE SIGN-UPS SAY

162 sign-ups, and most didn’t choose money

Data from the two beta forms (wave 1: 147; wave 2: 15). Totals only: this document copies no names, emails, phone numbers or personal answers.

Data	Wave 1	Wave 2	Total
Chose “Claridad con dinero” first	31	2	33 (20%)
Mention money, including alongside other areas	38	2	40 (25%)
Use Android	62	6	68 (42%)
Live in Colombia (the largest group)	53	5	58 (36%)
Yes to the WhatsApp group	121	9	130
Yes to a 7-day test	142	14	156

What it changes for the test

- Pick the 5-6 from the 40 who mentioned money. Wave 2 has only 2.
- The beta only opens Money, but 4 in 5 sign-ups chose another area first (mainly purpose, routine and confidence). That matches what we already heard: some people stopped because only Money was available. Say so in the invitation, or open their area.
- 42% use Android. If the test app is iPhone-only, way B (WhatsApp) is how to include them.
- Colombia is the largest group. There it’s «arriendo», not «alquiler», and bills are «los servicios». María decides whether the Spanish uses Colombian words or neutral ones.

What the money group is looking for (themes, no quotes)

- Their relationship with money, and feeling deserving.
- Money not stretching far enough, and how to save without wasting.
- Consistency in tracking their spending.
- Changing jobs or countries, starting over, more income.
- Connecting purpose and money; for some, investing.

Week 1 covers money not stretching, saving and investing. Missing: “relationship with money and deserving” and “more income or a job change”, both candidates for week 2, in Alejandra’s voice.

TEST KIT / 1 OF 4

Who and how

Who

5-6 women from the 40 who mentioned money when signing up, who differ from each other: fixed and variable income, someone with no income right now, with and without debt, sending money to family or not, on iPhone and on Android. Better if not all are close to María: friends tend to be polite.

Two ways to run it

Way	When	What María does
A. In the app	Once the devs load V3.2.	Sends three follow-up messages and holds two conversations.
B. Over WhatsApp	From this week.	Each morning sends the day’s text, then replies with the prepared text for whatever she picks (separate file).

A caution about way B: the women are talking to María, which changes the experience. It tests the content, not the app. If it lands much better with María, that tells you something too: a person’s presence matters.

The week

When	What happens	María’s time
Day 0	Invitation, consent and a short conversation (2 questions).	10 min per person
Days 1-7	She does one day per day, 3-4 minutes.	Way B: a few minutes a day
Day 2, morning	“Do you remember yesterday’s rule?”	1 message
Day 4, afternoon	“Was there anything that made you want to stop?”	1 message
Day 5, morning	“Do you remember yesterday’s rule?”	1 message
Day 8	Closing conversation (6 questions).	15 min per person
After	Fill in the record sheet and decide what to change.	1 hour

TEST KIT / 2 OF 4

Messages ready to copy

INVITATION · TO COPY

Hi, [name]. We’re testing some short money practices in Elara: 3-4 minutes a day for one week. We want to know what helps you and what doesn’t, and your opinion changes what we build. We don’t need amounts, screenshots or personal details, and you can stop whenever you like. Would you like to join?

CONSENT · TO COPY

Before we start: we’ll ask you a few short questions by message and have two brief conversations. We won’t ask for amounts, screenshots or account details. What you tell us is summarised without your name. Nobody on the team will read what you write inside the app for this test. You can stop whenever you like, without explaining why. Do you agree?

The team must be able to keep the line “Nobody on the team will read what you write inside the app”. If it can’t, remove it before sending.

DAYS 2 AND 5, MORNING · TO COPY

Good morning, [name]. Before you open Elara: do you remember yesterday’s rule? Tell me in your own words. “I don’t remember” helps us too.

DAY 4, AFTERNOON · TO COPY

How’s it going? Was there anything these days that made you want to stop? Any answer helps.

IF SHE STOPS REPLYING · TO COPY

Thank you for what you did. If you’d like to tell us when you stopped and what was going on, it helps a lot. If not, that’s completely fine.

TEST KIT / 3 OF 4

The exact questions

Day 0: short conversation (choose 2)

- “Think of the last time you made or put off a money decision. What were you trying to solve, and what did you do?”
- “When you opened Elara, what did you hope it would do for you?”
- “What money word or idea would you like someone to explain with an example?”

Day 8: closing conversation

- “Without looking at the app: which rule are you taking with you? Explain it as you would to a friend.”
- “Which part gave you something you weren’t clear on before? If none, what was missing?”
- “Did you try any idea outside the app? No is a fine answer too.”
- “Did you feel the app took your answers into account? When?”
- “Which day would you open again, and which would you remove?”
- “If there were a week 2, what would you like it to be about?”

How to listen

Ask for a recent example. Accept “I don’t know”. Don’t finish her answer for her or correct it. If she already knows something, that isn’t a lack of interest: note it and think about a higher level.

Care

- María doesn’t give financial advice during the test.
- If someone mentions serious debt or a possible scam: listen, don’t advise, and suggest her bank or her country’s financial regulator, as on day 6.
- Don’t copy private answers into groups or documents: summarise what repeats, without names.

TEST KIT / 4 OF 4

Record sheet and how to decide

One row per participant, no names. “Remembered the rule”: yes, partly or no.

	Remembered the rule (day 2 / 5 / 8)	Tried something outside?	Stopped at	What helped	Would change	Week 2 about
P1						
P2						
P3						
P4						
P5						
P6						

How to decide afterwards

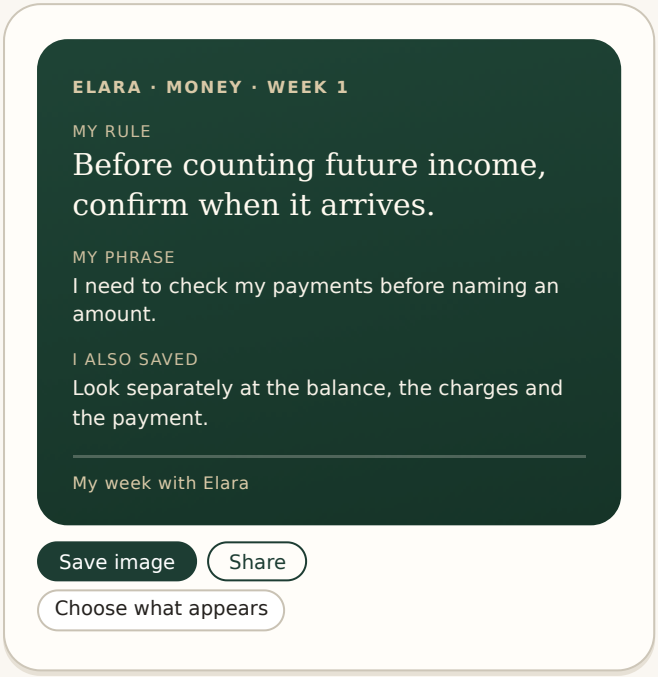

- If 4 of 6 can say the rule in their own words on day 8, the rule works. If 2 or fewer can, rewrite the rules before anything else.
- If 2 or more stop on the same day, look at that day first.
- If nobody tried anything outside the app, change the “If you want to try it” lines.
- If several ask for the same topic, week 2 starts there.
- Six people aren’t statistics: this finds problems; it doesn’t prove results.

WEEK CARD

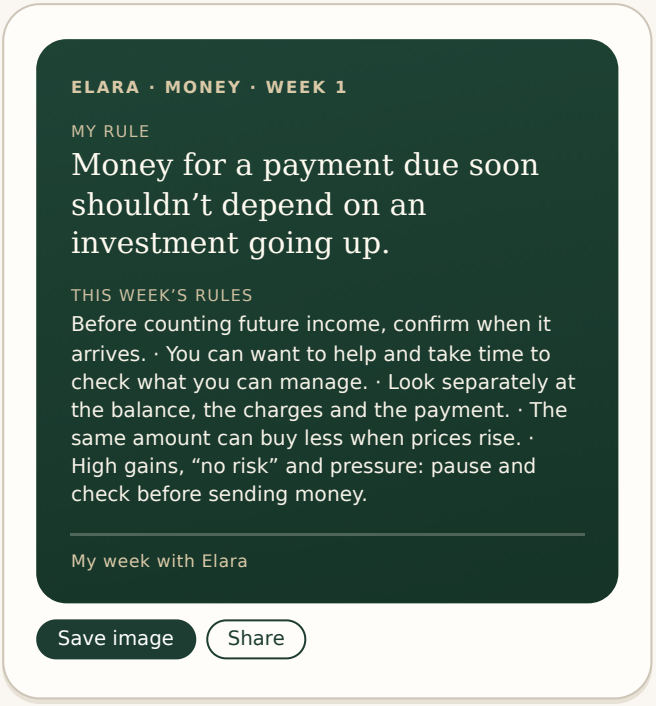

Something to take outside the app

After saving her rule on day 7, she can see a card with what she chose and save it as an image on her phone.

IF SHE SAVED THINGS DURING THE WEEK

IF SHE SAVED NOTHING

Card rules

- She chooses what appears: each line can be removed before saving.
- Amounts, names and her open question never appear.
- The image is created on her phone. “Share” opens the phone’s options; Elara publishes nothing.
- If she saved nothing, the card shows the rule she chose today and the week’s other rules. It’s never empty.
- For the devs: the app already has a card that saves to photos and shares; this one can reuse it.

WEEK 2 / 1 OF 3

Day 7 no longer just ends

V3.2 is updated: at the close of day 7, she picks what she wants to learn, Elara tells her which day covers it and offers her week card.

DAY 7 · SCREEN 4 (V3.2 UPDATED)

YOU TAKE AWAY

YOU TAKE AWAY
Your rule: “[the one she chose or wrote]”.

IF YOU WANT TO TRY IT
Explain your rule to someone in your own words. Telling it is a good way to remember it.

Save my rule | Finish without saving

If she chose none

ELARA
You can finish without saving anything. The explanations stay available if you want to come back.

What would you like to learn next week?

Debt and interest | A cushion for emergencies | Starting to invest | I don’t know yet

If she taps “Debt and interest”

ELARA
That’s days 2 and 3 of week 2.

If she taps “A cushion for emergencies”

ELARA
That’s day 1 of week 2.

If she taps “Starting to invest”

ELARA
That’s days 5 and 6. First, day 1: a cushion, so money for an emergency doesn’t depend on an investment.

If she taps “I don’t know yet”

ELARA
Week 2 starts with a cushion for emergencies. You can choose later.

See my week card

Note: Don’t say she now knows how to invest, has saved or has gained confidence. No tasks or reminders.

Week 2 starts tomorrow.

Why this way

- Week 2 has a fixed order, like week 1: today’s app doesn’t change the order per person.
- Her choice doesn’t reorder anything: it tells her when her topic arrives. That’s honest, and it can be built today.
- If she picks investing, Elara reminds her the cushion comes first: that’s the rule from week 1, day 2.

WEEK 2 / 2 OF 3

Seven days, seven rules

Same format as week 1: four screens, one rule, an example with checked numbers and one optional idea to try. An outline for María to choose topics and order.

Day	Topic	Today’s rule	The example
1	A cushion for emergencies	A cushion starts small, with a purpose and a separate place.	Setting aside US$10 a week: in 18 weeks that’s US$180, one month of Ana’s rent.
2	More than one debt: which first?	Before deciding which debt to pay first, compare how much interest each one charges.	An extra US$50 on a debt at 40% a year avoids about US$20 of interest in a year; on one at 15%, about US$7.50.
3	A debt that grows on what it already grew	An unpaid debt can grow on what it has already grown.	US$100 at 30% a year, unpaid: US$130 after one year and US$169 after two.
4	Charges that repeat on their own	Check the charges that repeat on their own: small, repeated amounts add up.	Three monthly charges of US$8, US$10 and US$12 are US$30 a month: US$360 a year.
5	From buying from a company to owning a part	Knowing the product isn’t the same as understanding the share.	A fictional company: what part am I buying, and at what price? (V3 text)
6	What a gain does over time	If a gain stays, the next calculation is made on more.	US$100 at 5% a year for 20 years: US$265 if the gain stays; US$200 if not.
7	Review and week-2 card	The one she chooses.	Two recall questions (days 2 and 4) and her card.

The percentages are examples, not real rates in any country. The debt calculations use simplified annual interest; every contract calculates its own way.

WEEK 2 / 3 OF 3

Each day’s question and what’s missing

Day	Screen-2 question	Supported answer	If you want to try it
1	You set aside US$10 a week. How many weeks to reach US$180?	18 weeks (10 × 18 = 180).	Choose a separate place for your cushion, even if it starts small.
2	You have an extra US$50. One debt charges 40% a year, another 15%. Where do you avoid more interest in a year?	The 40% one: about US$20, against US$7.50.	If you have debts, check what interest each one charges.
3	US$100 at 30% a year, unpaid. How much at the end of year two?	US$169 (130 × 1.30).	Check your statement to see whether interest is added to the balance.
4	Three monthly charges of US$8, US$10 and US$12. How much a year?	US$360 (30 × 12).	Look at last month and mark the charges that repeat on their own.
5	Which question looks at the company as an investment?	What part am I buying, and at what price?	Think of a company you use and write how you think it makes money.
6	US$100 at 5% for 20 years. How much if the gain stays?	US$265 (against US$200 if it doesn’t).	When you see a gains figure, ask: over how long, and with what risk?

An important day-2 reply

If she taps “I’d rather pay off the smallest first”: “That’s a valid decision too: closing a debt gives you momentum. The one with the most interest usually costs less over time; it’s your choice.”

Before building it

- Today week 2 is closed to anyone without beta access: the known week-2 blocker. It must be fixed before day 7 announces week 2.
- María decides the topics and the order. If the test asks for another topic, change it here.
- Every reply is written in advance, as in week 1.
